BENSON KIMANI MUKURIA

Nairobi, Kenya | +254 796 436966 | benson.kimani.mukuria@gmail.com
Portfolio: bensonmukuria.github.io | LinkedIn: linkedin.com/in/benson-kimani-mukuria

PROFILE

BSc Computer Science graduate with experience building batch ETL data pipelines, SQL Server data warehouses, and data quality controls. Skilled in T-SQL, Python, Medallion Architecture (Bronze, Silver, Gold), and star schema modeling. Built data pipelines integrating 60,000 records into analytical views with zero orphan records. Experienced in public database auditing, Data Protection Act 2019 compliance, and IT system administration.

TECHNICAL SKILLS

Data Engineering & SQL: T-SQL, SQL Server, Batch ETL/ELT Pipelines, Medallion Architecture, Star Schema Modeling, Stored Procedures, Views, Window Functions

Data Quality & Governance: Data Quality Controls, Validation Assertions, Error Profiling, Data Protection Act 2019 Compliance

Programming & Tools: Python, R, Power BI, DAX, Power Query, Excel, Git, GitHub, SSMS, Windows and Linux Administration

EDUCATION

Dedan Kimathi University of Technology, Nyeri
Bachelor of Science in Computer Science | May 2017 - May 2021

DATA ENGINEERING PROJECTS

Multi-Source Sales Data Warehouse (Medallion Architecture) |
bensonmukuria.github.io/Projects/Warehouse/bike_sales_data_warehouse.html

- Architected a 3-layer Medallion data warehouse in SQL Server integrating 60,398 sales records across 6 CRM and ERP source files into a Star Schema.
- Wrote T-SQL stored procedures with TRY...CATCH error handling to automate full table refreshes across Bronze staging, Silver cleansed, and Gold reporting layers.
- Reconciled schema conflicts, deduplicated customer records using ROW_NUMBER(), calculated product validity windows with LEAD(), and parsed integer dates using TRY_CONVERT().
- Executed automated data quality assertions across dimension and fact views to guarantee 100% referential integrity and zero orphan records.

Store Sales Performance Data Pipeline & Analytics | bensonmukuria.github.io/Projects/pizza_sales_report.html

- Processed transactional sales logs across 12 store locations ($817.86K revenue) using Power Query to supply clean data products for reporting.
- Built dynamic DAX measures and dimensional models to track revenue drift, order volume, and peak demand hours.

PROFESSIONAL EXPERIENCE

ICT Intern — Ministry of Education | May 2024 - May 2025

- Set up and configured ICT systems in over 80 schools, ensuring they worked smoothly and addressing any technical issues that arose.
- Trained school staff on how to use ICT tools effectively, helping them make the most of available technology.
- Regularly maintained computer systems to keep them running efficiently and reduce downtime.
- Kept track of ICT equipment and managed its distribution, ensuring everything was accounted for.
- Worked with teams to troubleshoot technical problems and find practical solutions.
- Used system performance data to identify areas for improvement and suggest ways to optimize ICT infrastructure.

Data Analyst Intern — National Social Security Fund (NSSF) | July 2022 - July 2023

- Worked with teams to analyze data and create visual reports using Power BI and making it easier for stakeholders to understand key insights.
- Built and updated interactive dashboards, which helped improve decision-making efficiency in benefit processing by 20%.
- Verified data accuracy in the Registration department, ensuring all member information was correct and reliable.
- Assisted the finance team by analyzing financial data and preparing reports for forecasting and planning.

- Identified trends in data and provided recommendations to address risks and opportunities.

IT Support Intern — Kenya Power and Lighting Company (KPLC) | January 2020 - April 2020

- Installed and maintained systems like Customer Service, Design and Construction Systems, and Microsoft Office, ensuring they worked properly.
- Set up and managed printers, both locally and over the network, to streamline printing processes.
- Performed maintenance tasks like formatting computers and installing operating systems to keep systems running smoothly.
- Handled networking tasks, including setting up routers, activating ports, and resolving IP phone issues.

CERTIFICATIONS

Data Protection Course - Strathmore University (CIPIT) | 2025

- Learned key principles of data protection, privacy, and regulatory compliance.
- Gained practical knowledge of secure data handling and ICT security best practices.
- Developed an understanding of organizational responsibilities in protecting personal data and ensuring compliance.

IBM Data Analytics | 2022

- Improved my skills in Excel, including data cleaning, pivot tables, and creating charts.
- Learned how to use SQL for querying databases and integrating it with R for analysis.
- Gained experience in creating visualizations and dashboards using R Shiny and Power BI.
- Practiced presenting data insights clearly and engagingly.

Global Workforce Readiness - Griffins Global Technology | 2026

- Developed customer service expertise in complaint resolution, de-escalation, customer psychology, emotional intelligence, and problem-solving through hands-on simulations.

KEY ACHIEVEMENTS

- Increased claims processing efficiency by 20% at NSSF through better data analysis methods.
- Ensured 100% accuracy in data validation and reporting, supporting reliable decision-making.
- Developed interactive dashboards that made it easier for teams to access and understand data.
